

PLEASE forward this to the appropriate office who can stop the weekly violation of the do not call list by a very shady company calling itself "The New Jersey Window Factory". I get a weekly automated message lasting several minutes in length by this organization offering to replace windows, siding, refinance mortgage, the list is endless. I've tried to look them up, but no phone record exists for them. i've tried responding "do not call list" into the automated tape, but nothing has slowed the weekly calls at both home 732-968-8563 and work 732-878-7724. I am desperate to stop the madness of this onslaught!
